# PRAVAAH-360: Official 3-Minute Video Script

**Smart India Hackathon 2026 • AICTE PS SIH26262 • Team Six_In_Denial**

| | | | |
|---|---|---|---|
| **Problem Statement ID:** | SIH26262 | **Team Name:** | Six_In_Denial |
| **Sponsoring Organization:** | AICTE (Ministry of Education) | **Theme & Category:** | Smart Automation • Software |
| **Target Video Duration:** | **2:45 – 3:00 Minutes (~400 Words)** | **Live Prototype URL:** | frontend-lyart-chi-21.vercel.app |

## 1. Rapid 3-Minute Stopwatch Timeline

| Timestamp | Screen Display | Execution & Dialogue Focus |
|---|---|---|
| **00:00 – 00:35 (35s)** | Slide 1 & Slide 2 | Team Intro, Problem Statement ID SIH26262 & 3 Core Operational Bottlenecks. |
| **00:35 – 01:05 (30s)** | Slide 3 & Slide 4 | PRAVAAH-360 4-Pillar Architecture & Practical High-Assurance Tech Stack. |
| **01:05 – 02:25 (80s)** | **Live Prototype (Browser)** | **3 Live Interactive Moments: Expiry Renewal, Cadre Cure, & Escalation DSC Sign.** |
| **02:25 – 03:00 (35s)** | Slide 5 & Slide 6 | 75% Turnaround Reduction, Supreme Court June 30 SLA Compliance & Final Pitch. |

## 2. Word-for-Word Voiceover Script & Screen Directions

### PART 1: INTRO & PROBLEM STATEMENT (00:00 – 00:35)

**Visual on Screen: Display Slide 1 (Title Page), then smoothly transition to Slide 2 (Key Gaps).**

"Respected Jury, greetings from **Team Six_In_Denial**. We present our solution for **SIH26262**: *Integrated AICTE Approval Workflow Automation, Compliance Monitoring and Alert Management System*.

Every year, **10,500+ colleges** apply for AICTE approvals, but the process suffers from three critical bottlenecks:
1. Slow, manual file routing with zero stage-wise visibility.
2. Lapsed 30-year land leases, fire safety NOCs, and FDR guarantees that go unnoticed.
3. Overdue files idling on officer desks, risking the **Supreme Court June 30 national cutoff**.

Our solution is **PRAVAAH-360** — an enterprise regulatory engine engineered to make AICTE approvals automated, transparent, and legally bulletproof."

### PART 2: ARCHITECTURE & TECH STACK (00:35 – 01:05)

**Visual on Screen: Transition to Slide 3 (System Architecture & Tech Stack).**

"Built with a high-assurance, government-ready stack — **React, TypeScript, Python FastAPI, Celery, and PostgreSQL append-only audit tables** — PRAVAAH-360 delivers:
• A sequential **5-Stage Approval Workflow Engine**.
• A proactive **90-30-0 Expiry Alert Matrix**.
• A **Bureau-Wise Pendency Heatmap** with automated hierarchy escalation.
• And a **Native Android EVC Companion** using hardware APIs to eliminate fake GPS spoofing.

Crucially, while compliance audits are automated, **final approval authority rests strictly with authorized AICTE officers**.

Let's see it live on our production deployment."

## PART 3: LIVE PROTOTYPE WALKTHROUGH (01:05 – 02:25)

*Screen Action: Switch screen to browser at **https://frontend-lyart-chi-21.vercel.app/***

**Action 1 (01:05 – 01:45): Click 'Institution Portal' tab. Point out Supreme Court timer. Click 'Upload Renewal' on Building Stability $\rightarrow$ Click 'Simulate Renewal & Verify' $\rightarrow$ Show it turn green! Then scroll down and click 'Upload Recruited Faculty Orders' under APH Scorecard.**

"We are live on our Vercel production deployment. At the top is the active **Supreme Court (Parshvanath Case) countdown timer**.

In the **Institution Portal**, our **Statutory Expiry Engine** tracks the 30-year land lease and flags the Building Stability Certificate blinking red with only 18 days left. Watch as we simulate renewal: *[Click 'Upload Renewal' $\rightarrow$ 'Simulate Renewal & Verify']*. Instantly, it turns green and updates to 365 days valid!

Below, the automated APH rule engine detects a Faculty Cadre shortfall of 2 Associate Professors. Watch us cure it in the 7-day window: *[Click 'Upload Recruited Faculty Orders']*. In one second, the ratio recalculates to **100% Compliant**, and the file automatically queues for EVC inspection!"

**Action 2 (01:45 – 02:25): Click tab 'AICTE Bureau Console'. Show 8 Regional Offices heatmap. Click '+3d Delay' on application row $\rightarrow$ show Tier 3 escalation. Click 'Review & Action' $\rightarrow$ click 'Grant EoA Approval (DSC Sign)'. Then switch to 'Native EVC App' tab.**

"Switching to the **AICTE Bureau Console**, council leadership gets live **Pendency Heatmap visibility across all 8 Regional Offices**.

In the active cases queue, watch our **Hierarchy Escalation Engine**: We simulate an officer delay on application 1-984210: *[Click '+3d Delay']*. As SLA thresholds breach, the file automatically escalates to **'Tier 3: Bureau Head Escalated'**!

Opening the file: *[Click 'Review & Action' $\rightarrow$ 'Grant EoA Approval (DSC Sign)']*, the officer digitally signs the approval with simulated hardware DSC attestation.

Meanwhile, on campus visits, inspectors use our **Native Android App** *[Click tab 'Native EVC App']* — verifying isFromMockProvider: FALSE to block fake GPS, live-stamping lab photos with SHA-256 seals, and syncing offline queues!"

## PART 4: IMPACT & CONCLUSION (02:25 – 03:00)

**Visual on Screen: Switch back to Slide 5 (Impact and Benefits), then conclude on Slide 6 (Project Deliverable Proofs & Links).**

"PRAVAAH-360 delivers quantifiable impact:
- **75% faster turnaround:** Compressing 90-day approvals to under 20 days.
- **100% expiry compliance:** Zero unnoticed land lease or fire NOC lapses.
- **Zero SLA forfeitures:** 100% adherence to the **Supreme Court June 30 national cutoff**.
- **Complete audit defense:** Tamper-proof DSC audit logs protect AICTE in High Court litigations.

Test our live app at **frontend-lyart-chi-21.vercel.app**, and inspect our source code on GitHub.

PRAVAAH-360 makes AICTE approvals timely, transparent, and accountable. Thank you from **Team Six_In_Denial**!"

## 3. Quick One-Take Recording Checklist

- **Browser Setup:** Pre-load full-screen presentation slides on Tab 1, and the live web app on Tab 2 (https://frontend-lyart-chi-21.vercel.app/).
- **Speaking Speed:** Target a confident, steady pace of **~135–140 words per minute**.
- **The 3 Golden Clicks:** Click 1 (Upload Renewal on Building Stability), Click 2 (Upload Faculty Orders on Cadre deficiency), Click 3 (+3d Delay on Bureau console $\rightarrow$ Grant EoA Approval). Takes exactly 60 seconds to demonstrate!
